Heckington Windmill Bookmark

You will need:
1 Sail template copied onto white card
Rectangle 25cm x 5cm black card
Paper fastener
Scissors
White crayon / paint/ window marker

Make a small hole – to allow a paper fastener through – in centre of narrow edge at one end of black card, approx. 1cm from edge. Round off the corners of this end.

Cut around outside edge of sails template and along each marked line.
Make a small hole – to allow a paper fastener through – in centre of template
Working anti-clockwise on each segment in turn, take the right-angle corner at the centre of each outer line and fold it down to the centre point.
Turn the sails over and attach to the base with the paper fastener.

Draw doors and windows on the tower as required.

You could enlarge the template to make the sails larger and shape the tower card to make it wider at the base!
