

# Heckington Windmill

- ◆ Colour and cut out the tower.
- ◆ Colour the sails with crayon and cut out the circle of sails with their tie bars.
- ◆ Make a hole in each piece and fasten the sails onto the tower using a paper-fastener.
- ◆ Cut out the backing piece, and fold along the dotted lines so that A and B overlap to make a triangular pyramid.
- ◆ Glue flaps A and B to each other, and then glue this side of the pyramid onto the back of your windmill to make it stand up.
